LIGHTWEIGHT AND RECYCLABLE

Galanta® hidden fastener interlocking steel siding is engineered to protect your home or business against harsh weather while enhancing curb appeal and increasing property value.

Manufactured in panels covering 6 ¼ in. by 12 ft (50 sq. ft. per box, 8 panels per box), **Galanta®** steel siding is available in shaded wood grains, classic wood grains, and solid colors for vertical or horizontal installation. It pairs beautifully with exterior materials such as stone, brick, concrete, or glass, suiting both modern and traditional architectural styles.

With its concealed and perforated fastening strip, **Galanta®** siding installs easily and features notched ends for seamless overlapping. Each panel is embossed with a refined wood-grain pattern that enhances rigidity, minimizes oil canning, and delivers a premium finish.

PRE-PAINTED GALVANIZED STEEL
ASTM-A653 SS GRADE 33, Z275 (G90)
• 10,000 SERIES / KYNAR 500® (PVDF)
• WEATHER XL™ CRINKLE
GAUGE: 26 (.021" / 0.54 MM THICK)

BETTER THAN OTHER CLADDING MATERIALS

Unlike fiber cement and pressed wood siding, **Galanta®** siding is up to 50% lighter and easier to carry.

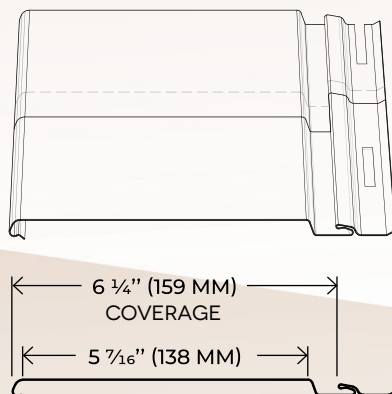

Unlike vinyl siding, **Galanta®** steel siding will not become brittle in cold weather and eventually break or crack.

Unlike wood siding, you will never have to stain or paint **Galanta®** siding.

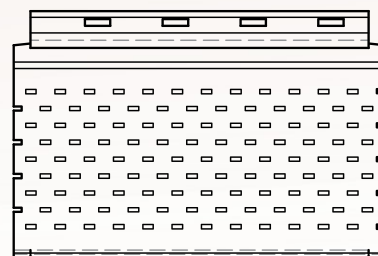

Unlike pressed wood and wood siding, **Galanta®** steel siding will never rot. Unlike aluminum and vinyl siding, **Galanta®** siding's paint finish will not fade or chalk and comes with a limited **40-year transferable warranty**.

Contrary to wood and pressed wood that are not recyclable and contribute to depleting forests, **Galanta®** steel siding is made of steel—the **world's most recyclable material**.
