

16.00"

The ML-150 Mechanical Lock (1.5" High Standing Seam) features structural performance and architectural aesthetics. The ML-150 can be manufactured on job sites for various substrates and uses concealed fasteners with a fixed and/or floating clip system. The floating clip system reduces the effects of thermal stresses on the ML-150 panel system, maintaining a unique smooth, uniform appearance, despite fluctuations in temperature.

ML-150 Mechanical Lock Panel is a mechanically seamed, vertical leg standing seam roof system that combines a 1.5" tall slim rib with exceptional uplift resistance and is available in a 16-inch width and allows for the installation directly over purlin and bar joists.

ML-150 Panels are designed to withstand the most rigorous weather conditions.

FEATURES

- 24 GA steel.
- · Colors available on standard, premium and metallic.
- · Curved available.
- On site or factory made.
- Available in smooth, striated and stiffener ribs.
- UL Construction Number: TGKX5549.
- Uplift resistance of prepared roof-covering materials UL 580 Class90.
- Impact resistance of prepared roof-covering materials UL2218 Class 4.
- Fire tests of roof coverings UL 790. Class A, B, C. External fire exposure.
- TDI Approved.

PRODUCT SPECIFICATIONS

• Applications: Roof and Wall • Coverage Widths: 16"

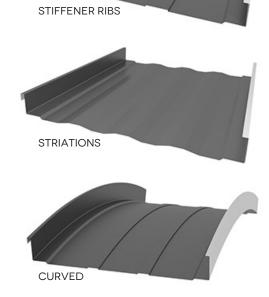

• Minumum Slope: 1/2:12

• Panel Attachment: Standing Seam System, clip fixed and floating.

· Gauges: 24 (standard), 22 and 26 (optional)

• Coatings: Galvalume®, Storm Armor (Durapon 70®, Ceranamel®).

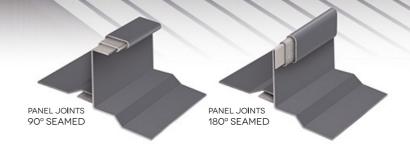

• Substructure: Plywood or OSB to be a nominal 5/8 inch thick, Open Framing and Metal Decking.
